

RV Toilets & Septics APPLICATION GUIDE

Start with ez-clean. Add **1 cup of ez-clean to 10 cups of water** directly into your empty RV septic tank. Repeat this step each time you empty the tank.

Apply ez-clean after each use. Spray directly into the toilet bowl after every use to help control odours and break down organic waste.

Safe alternative to chemicals. **ez-clean** is non-toxic and biodegradable—a **safe, effective substitute** for chemical pucks in RV toilet systems.
