

Vehicles & RV's

Vehicles easily get odors trapped because of the amount of fabric and damp footwear. A few ideas on how to keep your vehicle fresh are outlined below.

Application of ez-clean

Smells (cigarette smoke, footwells, pets, food, mice, etc) :

- Ez-clean easily removes odors. Simply spray once a day on vehicle surfaces and let dry.

Stains on Seats or Upholstery :

- If chemicals were previously used to try to clean a stain, you must rehydrate the stain with water and blot dry to remove any residue.
- Pick up excess organics and solids. Blot excess liquid.
- For this application, you can dilute ez-clean by 1:10, or for quicker results apply ez-clean full strength.
- New stain: If still wet, apply ez-clean directly to the stain.
- Dry stain: Pre-wet the stain with water, then apply ez-clean to the area.
- Once ez-clean is applied to a stain or smell, walk away and leave it to dry. Then it's life cycle is complete.

RV Septic Tanks ;

- Spray ez-clean into the toilet bowl after every use to help break down solids and prevent smells.
- Much more cost effective than purchasing pucks!

Additional Information

- Once diluted the product will only stay alive for two weeks, so only mix what you need.
- Ez-clean is safe on virtually every fabric. The only issue that might occur is on fabrics that are naturally dyed with products such as beet juice.

ez-clean uses

- dog run and kennels
- decks
- fences
- barns
- stock trailers
- vehicles
- mattress stains
- medical scrubs
- organic carpet stains
- organic upholstery stains
- garbage cans
- sport equipment
