

Skunk Spray on Your Dog

Fido found a skunk, and often dogs are sprayed directly in the face. As with anything, please take extra care when cleaning your dog's face.

We recommend not bringing your dog indoors, and instead using a garden hose outside.

Application of ez-clean

- Be sure to do a pre-wipe of your dog's coat to remove any extra skunk spray before applying ez-clean.
- Pre-wet your dog and spray ez-clean full strength on him/her. For their face, spray ez-clean into a rag or on your hand and work it in, avoiding eyes, nose and ears.
- Rub it in like a leave in conditioner. Do not rinse.
- The longer your dog stays wet, the longer ez-clean will work.
- The odor will immediately subside, but a 2nd application will probably be required.

Additional Information

- Imagine that moisture is the highway in which ez-clean travels, so make sure the area is wet. This enables the enzymes in ez-clean to move around and find the organics.

ez-clean uses

- dog run and kennels
- decks
- fences
- barns
- stock trailers
- vehicles
- mattress stains
- medical scrubs
- organic carpet stains
- organic upholstery stains
- garbage cans
